

Battery Tips: Stay Charged & Ready to Roll!

We're here to keep you cruising with confidence! Follow these battery tips to make sure your equipment is always ready to go when you are.

Charging Guidelines:

Here's how to keep your ride powered up and happy:

- **Daily driver?** Charge it every night for **8–14 hours**.
 - **Occasional outings?** Charge it **2–3 times a week** for **8–14 hours** each time.
 - **Storing for more than 2 weeks?** Give it a full charge, then disconnect the batteries.
 - **At the very least,** plug in and charge your chair **once a month** for **8–14 hours**.
-

Things to Avoid (*Your Battery Will Thank You*):

- **Don't overdo it!** Charging for more than **24 hours** straight can wear things out.
 - **Don't run it dry!** Avoid draining your battery all the way down to the last red light.
 - **No car chargers allowed!** Only use the charger that came with your equipment—no wet-cell or car battery chargers.
-

A Little Maintenance Goes a Long Way

Just like your car needs an oil change, your power chair needs a yearly checkup. We recommend **annual maintenance**—and your batteries might need to be swapped out once a year too. Even with perfect care, no battery lasts forever!
